

List of Top Ten Energy Efficiency Best Available Technologies(BATs)

Building Sector

No.	BAT Title	Nominator
1	Building energy management and information systems	United States
2	Carbon dioxide (CO ₂) heat pump water heaters for home use ecoCute "ESTIA Premium Model"	Japan
3	Condensing gas tankless water heaters	United States
4	Heat pump water heaters	United States
5	Intelligent district heating platform with monitoring and operation optimization technology in heating system	China
6	Key technologies of centrifugal units based on temperature and humidity independent control system	China
7	Light-weight, small-sized, low-cost high efficiency LED high-bay lighting fixtures	Japan
8	Occupant responsive lighting	United States
9	Split-type air conditioner "Kirigamine FZ Series"	Japan
10	Treatment process of the prefabricated directly buried thermal insulating pipes	China

Note: the list is alphabetically ordered.
