

OUR MISSION

Fostering global collaboration to enhance energy efficiency.

OUR GOAL

The Energy Efficiency Hub is a government-to-government platform for global collaboration on energy efficiency, pursuing solutions through Task Groups focused on topics of common interest to Hub Members. The Hub supports exchange of information and best practices between countries, international organisations and the private sector.

WHAT IS THE HUB?

The Hub is a voluntary collaboration among **16 governments** seeking to strengthen their effectiveness in deploying energy efficiency. The Hub has members across the globe: Argentina, Australia, Brazil, Canada, China, Denmark, European Commission, France, Germany, Japan, Korea, Luxembourg, Russia, Saudi Arabia, United Kingdom and United States.

TASK GROUPS

- | | | |
|---|-----------------|---|
|  | DWG | The Digitalisation Working Group informs and advances the digitalisation of energy-efficient technologies. |
|  | SEAD | Super-Efficient Equipment and Appliances Deployment is a collaboration among governments to promote the manufacture, purchase, and use of efficient appliances, lighting, and equipment worldwide. |
|  | TOP TENS | TOP TENS prepares lists of both best energy-efficient technologies and best practices in key energy-consuming sectors the governments can promote. |
|  | EMAK | The Energy Management Action Network facilitates public-private exchanges on systems for raising energy efficiency in industry and buildings. |
|  | EEB | Energy Efficiency in Buildings serves as a platform to exchange policy information about improving energy efficiency in buildings. |

MEMBERSHIP

Membership is open to participation by countries committed to government-to-government collaboration on energy efficiency. IEA Members, IEA Association countries and Clean Energy Ministerial Members are eligible to join the Hub.
